Digital

- * The screen displays a random set of 3 different numbers (e.g. 3, 7, 2) for 1 second.
- * Then the display disappears.
- * The numbers from 1-9 are displayed on the screen (i.e. 1 2 3 4 5 6 7 8 9).
- * The student is expected to click on the three correct numbers in the same order they appeared on the screen in step 1 (i.e. 3, 7, 2). The student is given 1 second to respond.
- * If the student responded correctly, then another random set of the next level is displayed.
- * If the student responded correctly to the second attempt, then a new set of numbers of next level is displayed. And so on.
- * The test stops when the student fails both attempts of a level. This means, student does not cover all levels if he fails.

Visual

- * The screen displays a random pattern of 3 blocks in a 3x3 matrix for 1 second.
- * Then the display disappears.
- * An empty 3x3 matrix appears.
- * The student is expected to recreate the pattern on this empty 3x3 matrix by clicking on the correct cells. The student is given 1 second to respond.
- * If the student responded correctly, then another random pattern of the next level is displayed.
- * If the student responded incorrectly, then another random pattern of the same level is displayed.
- * If the student responded correctly to the second attempt, then a new pattern of next level is displayed. And so on.
- * The test stops when the student fails both attempts of a level. This means, student does not cover all levels if he fails.
